

POSITION DESCRIPTION

Position: Staff Application Engineer
Requisition ID: SAE0108_4
Reports to: Engineering Manager at corporate headquarters in Houston, Texas

Background

Pivot3 is a well-funded pre-IPO technology company founded by a team of industry veterans with a focus on software infrastructure for the networked storage market. The company's innovations, backed by numerous patents, simplify the deployment of networked storage and change the economics so that scalable networked storage can be affordably deployed in every IT environment.

Overall Position Objective

This position is responsible for developing, debugging, and executing scripts to automate application performance and compatibility tests. The ideal candidate will have extensive experience with scripting languages and be familiar with the Windows. The position also requires maintaining a test results database and working with the product developers, test and QA teams to quickly identify and resolve issues during development and integration testing.

Qualifications

Engineering Skills and Experience

- 3+ years experience with scripting languages (BASIC, Perl, etc)
- Experience with Windows development
- Database experience a plus (PHP, MySQL, etc)
- Proven debug and problem solving abilities

Personal Qualities

- Demonstrated ability to work within and across development organizations
- Self starter, energetic, intelligent, logical
- Excellent verbal and written communication skills
- Team player capable of tangible contributions and results
- Highest levels of ethics and integrity

Education

- Bachelor's Degree in Electrical/Computer Engineering or Computer Science
