

PIVOT3 SERVERLESS COMPUTING™ PLATFORM NAMED PRODUCT OF THE YEAR FINALIST BY ACCESS CONTROL AND SECURITY SYSTEMS

Leading-Edge Virtualization Technology Recognized by Security Publication

Palo Alto, Calif. – September 30, 2008 – Pivot3, Inc, the market leader in High-Definition Storage™, today announced that the Pivot3 Serverless Computing™ platform has been named New Product of the Year Finalist by Access Control and Security Systems magazine. This follows the recent “Best Virtualization Solution” award that the company won for this technology at Linux World earlier in the year.

The Pivot3 Serverless Computing platform allows surveillance directors to run video surveillance applications such as video recording, access control and video analytic software directly on the Pivot3 clustered storage platform. With this innovative approach, users can eliminate the physical NVR server hardware required in a conventional solution to realize hard savings in cost, rack space, power and cooling. In a set-up with 500 cameras, a customer can realize savings of 44 percent in power and cooling costs, 51 percent in rack-space usage and 22 percent in cost savings by eliminating 15 physical servers and 5 physical failover storage RAIDs.

Access Control and Security Systems' New Product of the Year Award honors excellence in new product development in the security industry. The award showcases the most innovative product of the current year and recognizes the talent and commitment of the people involved in every aspect of development, from concept through sales.

About Pivot3

Pivot3 is the fastest-growing storage company in the high-definition storage market, with its award-winning High-Definition Storage technology being deployed in the gaming, homeland security, public safety, educational and transportation markets. The company introduced the innovative RAIGE (RAID Across Gigabit Ethernet) architecture that redefined the use of

storage in capacity and bandwidth-intensive environments. For markets such as surveillance and video streaming, Pivot3 has replaced standalone DAS RAID boxes with an IP SAN solution that matches the availability, manageability, performance and cost targets of these customers. For more information, please visit www.pivot3.com or call (877) 574-8683.

Pivot3, High-Definition Video Storage, RAIGE, HyperPath and Pivot3 Serverless Computing are trademarks or registered trademarks of Pivot3, Inc. All other brands or products are trademarks or registered trademarks of their respective holders and should be treated as such.
