

PIVOT3 DEMONSTRATES HIGH-DEFINITION VIDEO STORAGE SOLUTION AT WORLD GAME PROTECTION CONFERENCE

Spring, Texas – February 14, 2008 – Pivot3 Inc, the inventor of high-definition storage based on distributed RAID, today announced the company’s participation at the World Game Protection Conference, Las Vegas, Nev., February 19-20, 2008. At this two-day international summit dedicated to casino game protection, attendees visiting the Pivot3 booth #22 will be able to see demonstrations of the latest high-definition storage, supporting a variety of cameras and video surveillance applications, and reducing storage infrastructure costs by as much as 50 percent.

Optimized for megapixel video and implemented by various casinos throughout the country, the Pivot3 High-Definition Storage System increases data security and helps organizations store twice the video while supporting up to five times the data streams of traditional modular storage systems. The Pivot3 IP-based system adds a higher level of data protection across multiple networked storage nodes, called Databanks, which are built using industry-standard x86 servers and disk drives, and are connected via common Gigabit Ethernet. Databanks are added to cost-effectively scale recording capacity and megapixel, high-definition camera support.

For more information and to see a live demonstration, visit Pivot3 at booth #22.

About Pivot3

The Pivot3 block-based infrastructure virtualization solutions, targeting various data-intensive applications such as video surveillance, reduce costs by up to 50 percent and deliver up to five times the performance, with superior data protection. With several patents pending, the company boasts strong intellectual property and is backed by Lightspeed Venture Partners, InterWest Partners, Mesirow Financial Capital Partners IX,

and Silver Creek Ventures. For more information, please call 1-877-5-PIVOT3 or visit the company's website at www.pivot3.com
