

**PIVOT3 TO DEMONSTRATE HIGH-DEFINITION STORAGE SOLUTION AT
SOUTHERN GAMING SUMMIT 2008**

**Casinos Realize Major Cost Savings and Increase Scalability with the Pivot3
Storage Solution**

Houston, Texas – May 5, 2008 – Pivot3 Inc, the inventor of High-Definition Storage™, will exhibit the award-winning Pivot3 High-Definition Storage™ solution at the Southern Gaming Summit in Biloxi, Miss., May 7-8, 2008, at the Pivot3 Booth 344. Pivot3 storage has been implemented as part of large video surveillance deployments by casinos throughout the country, reducing their storage infrastructure costs by as much as 50 percent while increasing scalability for future growth.

The High-Definition Storage from Pivot3 is a clustered storage array, aggregating capacity and bandwidth using the company's RAIGE™ (RAID across Gigabit Ethernet) architecture. The Pivot3 solution stores twice the video and supports up to sixteen times the data streams of traditional modular storage systems, adding a higher level of data protection across multiple networked storage nodes, called Databanks. The Databanks are built using industry-standard x86 servers and disk drives, and are connected via common Gigabit Ethernet.

For more information and to see a live demonstration, visit Pivot3 at booth #344.

About Pivot3

Pivot3 invented its award-winning High-Definition Storage™, delivering more than sixteen times the performance at half the cost of traditional solutions, to uniquely solve the storage needs of bandwidth and capacity-intensive environments such as video surveillance. The company has raised \$46 million in private financing to deliver leading-edge storage technology to its growing customer base in public safety, gaming, education

and federal markets. For more information please visit www.pivot3.com or call 877-574-8683.
