

**PIVOT3 TO DEMONSTRATE HIGH-DEFINITION STORAGE SOLUTION AT
GLOBAL BORDER SECURITY CONFERENCE AND EXPO 2008
Government Customers to Take Advantage of Leading-Edge Storage Technology
from Pivot3**

Houston, Texas – May 19, 2008 – Pivot3 Inc, the inventor of High-Definition Storage™, will exhibit the award-winning Pivot3 High-Definition Storage™ solution at the Global Border Security Conference and Expo in Austin, Texas, May 21-22, 2008, at the Pivot3 booth #505. Implemented by various government customers, the Pivot3 storage is part of large-scale video surveillance deployments around the world, reducing storage infrastructure costs by as much as 50 percent while increasing scalability for future growth.

The High-Definition Storage from Pivot3 is a clustered storage array, which aggregates capacity and bandwidth using the company's RAIGE™ (RAID across Gigabit Ethernet) architecture. The Pivot3 solution stores twice the video and supports up to sixteen times the data streams of traditional modular storage systems, adding a higher level of data protection across multiple networked storage nodes, called Databanks. The Databanks are built using industry-standard x86 servers and disk drives, and are connected via common Gigabit Ethernet.

For more information and to see a live demonstration, visit Pivot3 at booth #505.

About Pivot3

Pivot3 invented its award-winning High-Definition Storage, delivering more than sixteen times the performance at half the cost of traditional solutions, to uniquely solve the storage needs of bandwidth and capacity-intensive environments such as video surveillance. The company is the fastest growing storage company in the video

surveillance market, and its leading-edge storage technology has been deployed in public safety, gaming, education and federal markets. For more information, please visit www.pivot3.com, or call 877-574-8683.
